

The structure OF HARTMETALL ESTECH AG

The ESTECH Group AG was founded in 2006 to summarize different small and medium-sized companies of the metal processing and to achieve an added value in the group instead of being "alone". Hartmetall Estech AG completed this plan in 2013. By a common action in sales and marketing, administration and the financing politics advantages arise compared with the being alone and with a higher profitability. The customers have a profit from professional structures, a wide range of articles and modern technology. ESTECH Group AG offers demanding and safe jobs to their employees.
